Zurich Horizon Multi-Asset Fund II (the "Fund")
Class Z Net Accumulation Shares ISIN: GB00BTKH4B20
a sub-fund of Zurich Investment Funds ICVC (the "Company")
Management Company: Zurich Investment Services (UK) Limited, part of the Zurich Insurance Group

Objectives and Investment Policy
The aim of the Fund is to grow the amount invested over the medium to long term (5 or more years) and to keep the fund within a designated risk profile.

This Fund is one of a range of Zurich Horizon Multi-Asset funds which aims to cater for investors with different risk appetites.

This Fund is aligned to risk profile 2, the second lowest risk profile in this range, which means that it aims to deliver growth through assets that demonstrate moderate price fluctuations, with emphasis placed on fixed income securities and equities and some exposure to property. Risk profile 2 is not the same as the risk and reward indicator in the section below.

The Fund invests at least two-thirds of its value in other funds (underlying funds) that are managed by Threadneedle Asset Management Limited and its group of companies ("Threadneedle").

Through the underlying funds, at least 50% of the value of the Fund will be exposed to fixed income securities (such as corporate and government bonds) and to the shares of companies constituted or operating within developed markets (for example, UK, US, Europe and Japan). The Fund will also have some exposure to UK property. The Fund may also gain exposure to money market instruments, cash and near cash.

Save in exceptional circumstances, the actual asset class exposures will be in the following ranges: fixed income 35-65%; equities 25-55%; UK property 0-15%; and money market instruments, cash and near cash 0-10%. The Fund may use derivatives to reduce risk or cost or to generate additional capital or income at proportionate risk (known as "Efficient Portfolio Management").

EValue Ltd, an independent risk profile service provider, using the output from its investment research tools, produces a strategic weighting of asset classes aligned to the risk profile of the Fund based on a long term time horizon. EValue updates these weightings on a quarterly basis and Threadneedle will consider the weightings when taking active management decisions to decide on the composition of the investments of the Fund.

Income from investments in the Fund will be added to the value of your shares.

You can buy and sell shares in the Fund on any day that is a business day in London.

Risk and Reward Profile

TYPICALLY LOWER REWARDS, LOWER RISK

1 2 3

TYPICALLY HIGHER REWARDS, HIGHER RISK

4 5 6 7

Historical data may not be a reliable indication for the future.

The risk category shown is not guaranteed and may shift over time.

The lowest category does not mean ‘risk free’.

The Fund is in risk and reward category 4 because its mix of investment in bonds, equities and property have shown in the past a medium level of volatility. Volatility describes how much the price of shares in the Fund goes up and down.

Your investment in the Fund is not guaranteed. Positive returns are not guaranteed and no form of capital guarantee or protection applies.

The risk and reward indicator is not the same as the risk profile of the fund in the section above.

The Fund’s risk profile may limit the performance of the Fund.

You can find more information on risks under the “Risk Factors” section of the Prospectus.

The following are additional risks not covered by the Risk and Reward Indicator:

- Credit Risk: Bonds are affected by changes in interest rates, inflation and any decline in the credit worthiness of the issuer. It is possible that bond issuers will not pay the interest or return of capital promised.

- Liquidity Risk: The Fund invests in other funds and its liquidity depends upon the liquidity of those underlying funds. If underlying funds suspend or defer the payment of redemption proceeds, the Fund’s ability to meet redemption requests may also be affected.

- Currency Risk: The Fund invests in overseas equities. Currency fluctuations may affect the value of investments and the income from them.
Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
